

Skills

Languages: TypeScript, JavaScript (ES6+), Python 3, HTML5, SCSS/CSS3, SQL, Apex

Frontend Architecture: Angular 21, Lightning Web Components, Micro-Frontends, Complex State Management, DOM/Rendering Optimization

Infrastructure & Tools: Node.js, Webpack, Elasticsearch, Grafana, Figma, Git

UI & Design Architecture: Design Systems, Component Libraries, Complex Layouts & Grids, Product UI, Game UI, Cross-Platform UI

Spoken: English (Native), Mandarin (Conversational)

Experience

Salesforce | Technical Architect - Keynote Demos

JULY 2024 - MAY 2026, SINGAPORE

- Lead Keynote Demo Engineer:** Architected and engineered high-fidelity, production-grade AI prototypes for Agentforce and Salesforce's PaaS/SaaS stack, featured at premier events like *Dreamforce* where audience numbers exceed 10M.
- Complex State Management:** Engineered real-time data visualizations and complex product UIs handling probabilistic LLM outputs. Identified friction points in rendering performance and prototyped solutions to ensure flawless live-stage execution.
- Technical System Design:** Led frontend system design and technical execution for high-visibility product launches, bridging the gap between product requirements and flawless, live-stage rendering performance.

DBS Bank | Principal UI Developer & Frontend Lead

AUGUST 2018 - JUNE 2024, SINGAPORE

- Enterprise Design Systems:** Architected and engineered the company-wide frontend component library and large UI systems from the ground up. Scaled adoption across hundreds of developers by establishing strict CI/CD, linting, and WCAG accessibility pipelines.
- Platform Modernization:** Drove the Front-to-Back digital transformation of a core finance management platform, replacing legacy workflows with a highly performant, modern Single Page Application (SPA).
- High-Availability Engineering:** Engineered secure full-stack features, optimizing API data contracts and frontend state management to handle heavy, zero-downtime transactional loads without performance degradation.

Engineering Projects

potong.io | Serverless Geometry Engine (Angular 21)

- Stateless Architecture & Browser Physics:** Built a deterministic, database-free puzzle game utilizing a custom PRNG and real-time 2D geometry algorithms to bypass standard DOM latency.

Education & Research

National University of Singapore | B.Sc Physics

- Focus in Astronomy, Number Theory, and Computer Science.
- Algorithmic & Mathematical Research:** Authored multiple papers in Number Theory and Civil Engineering:
 - Prime Numbers Generated From Highly Composite Numbers; [PARABOLA \(UNSW\)](#)
 - On the Infinitude of Twin Primes; [pre-publication](#)
 - Dynamic Coupling and Scheduling of High-Speed Rail Carriages; [pre-publication](#)

Leadership & Service

Singapore Armed Forces | Artillery Officer

Reservist officer holding the rank of Captain.
